Company description

Columbus is a global IT services and consulting company, specializing in digital transformation with a focus on the manufacturing, retail & distribution, food & beverage, and life science industries. Headquartered in Denmark and with offices and partners across regions, Columbus advises, implements, and manages IT solutions within areas such as Cloud ERP, Digital Commerce, Data & AI, Customer Experience & Engagement, and Other Local Business.

Investment case

The investment case in Columbus is primarily driven by delivering on its growth strategy plan, 'New Heights', covering the period 2024-2026. The growth strategy includes the financial goals of growing the topline by 10% annually (CAGR) from 2024-2026 and achieving an EBITDA margin of 15% by the end of 2026. Growth is expected to be driven by expansion and investment in its service portfolio through M&A activities, an expansion to the life science industry, and an increase in customers with a broader range of services.

In 2024, Columbus continued its growth momentum, especially in the largest business line, Microsoft Dynamics. Columbus' EBITDA margin was 9.2%, however, with a positive effect from the M3CS legal case. To improve profitability and reach its 2025 EBITDA margin guidance of 10-12%, Columbus has streamlined its organization with a special focus on the weakest-performing business lines.

Looking at valuation multiples, Columbus trades at 9.4x EV/EBITDA (2024A), which is below the selected peer group of Nordic IT consultancy companies, trading at an average of 13.3x EV/EBITDA (2024A). If the company delivers on its new 2025 EBITDA margin guidance (midrange), Columbus will trade at 8.9x EV/EBITDA (2025E), which is in line with the peer group average of 8.9x EV/EBITDA (2025E).

Key investment reasons

Columbus is well-positioned in the IT services sector, as the company solves key challenges for its clients within secular trends such as automation, reshoring, cybersecurity, and ESG compliance. Columbus' exposure to business-critical ERP solutions (Dynamics and M3) was also a key factor for its growth in 2024 despite general challenges across the IT service sector.

Columbus has also streamlined its organization in 2024 with cost initiatives, reducing its reliance on market conditions. To deliver fully on its 2026 goals, however, the market might have to return to historical growth rates. Importantly, the target EBITDA margin of 15% by the end of 2026 does not seem unachievable when looking at other Nordic-listed IT consultancy firms.

A strategic review has been initiated to accelerate Columbus' growth strategy. This could potentially lead to a full acquisition of Columbus and thus potentially also a share price premium.

Key investment risks

Being a global IT consulting company with approx. 1,500 employees, growth is highly dependent on retaining and attracting the right employees across its business lines.

Following market headwinds by the end of 2024 with flattish growth in Q4 2024 and management comments that this has not changed materially into the start of 2025, there is a risk related to reaching the 2025 growth guidance. This is particularly the case if market conditions deteriorate in Columbus' key markets, as no buffer seems to have been built up at the start of 2025.

Columbus' major shareholder and chairman, Ib Kunøe, owns approx. 62% of the company's share capital. This implies that the free float and thus also share liquidity is relatively low. To that, Columbus could be delisted, depending on the outcome of its strategic review.

Overview of the selected Nordic IT and consultancy companies in the peer group:

Bouvet is a Norwegian IT and digital communication consultancy company with 2,360 employees, 14 offices in Norway, and 2 in Sweden by the end of December 2024. The company is closely comparable with Columbus when looking at the IT consultancy nature. Revenue from private businesses constitutes approx. 54% i.e. revenue from the public sector constitutes approx. 46%. The company's biggest customer segment is oil & gas, power supply, and public administration.

CombinedX is a Swedish IT consultancy company with approximately 585 employees, specialized in the digital transformation. One of the company's business segments is within CRM, where the company helps improve the customer journey, from marketing and sales to service and customer care based on solutions and services with Microsoft Dynamics 365 as a platform together with customer-specific add-ons. Earlier in 2024, CombinedX also acquired M3CS, the M3-focused IT consulting firm, that Columbus settled a legal case with (Columbus received SEK 44.8m from the settlement with M3CS).

Exsitec Holding is a Swedish IT consultancy company with 647 employees and 20 offices in Sweden, Norway, and Denmark. The company helps medium-sized companies to be more efficient with digital solutions, integrating with their business. In 2024, consultancy revenue constituted approximately 2/3 of the company's total revenue. Revenue from software constitutes about 24% of the total revenue, and support & infrastructure services constitute approx. 9% of the total revenue.

KnowIT is a Swedish IT consultancy with 3,860 employees and activities across the Nordics and in Poland. In Q4 2024, KnowIT generates 71% of its revenues in Sweden with Norway being its second-largest market, followed by Denmark and Finland. KnowIT runs a consultancy business model and has strong partnerships with Microsoft and AWS to deliver solutions for clients built on its partners' technology. The company has a roughly 60/40 split of private/public sector activities.

Loihde is a Finnish IT services company with 819 employees and offices in Finland and Sweden. The company helps organizations across various industries achieve their strategic goals through digital transformation, data management, analytics, and cybersecurity solutions. Approx. 55% of the revenue in 2024 is from security services. A newer strategy involves cloud and AI-based digital consultancy to target finance, healthcare, manufacturing, and energy industries.

Netcompany* is a large Danish IT services company specializing in next-generation IT projects with over 8,250 employees in over 10 countries. It has a strong position in Denmark, particularly within the public sector, and is expanding its reach in Europe, where it focuses on large-scale public and private sector projects. Netcompany operates a consultancy business model with around 1% of revenues from licensing. Netcompany generates +45% of revenues from Denmark and more than 65% of revenues from the public sector. As a Danish-listed consultancy company, we have included the company in the peer group.

NNIT is a Danish IT services company with more than 1,700 employees in Europe, Asia, and the USA. NNIT focuses on two business units, Life Science Solutions and Cloud & Digital Solutions. The company's consultancy-based business model delivers specialized digital solutions to Life Science clients, while delivering solutions based on the Microsoft Ecosystem in its Cloud & Digital Solutions business unit. As a Danish-listed consultancy company, we have included the company in the peer group.
